President's letter

The 2021 has marked such large financial hardships, and so much uncertainty that many of those that live in extreme poverty have faced.

Nevertheless, we have also been witness to many stories of exceptional people. Everyone with something in common, the transformation experienced in their lives to find **their way out of poverty and getting on track to prosperity.**

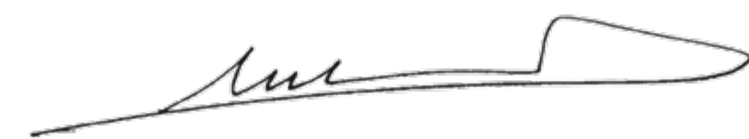

This year our team has supported almost **200,000 men and women** that have deployed their potential behind one of the **59 projects we've launched in Iberoamerica, Asia and Africa.**

In addition to that, this year we celebrate that there are more of us who join in on this work. New partners, public administrations, businesses and donors have helped us grow. This is great news, and proof of the recognition that CODESPA has earned through everyone's hard work.

All of the above reminds us of the endeavors that are yet to be achieved, there are many people that are influenced by the Foundation. Because of this, in the next few years, **we have proposed to support**, with relevant and impactful projects, a total of **10 million people.**

We know that this is quite a high aspiration, but we are convinced that we will make it with your help.

My most sincere affection,

Manuel Herrando Prat de la Riba
President of CODESPA Foundation

“Additionally, this year we celebrate that there are more of us who join this work”.

Who we are

We are on a mission to contribute to elevate 10 million more people from poverty to prosperity in the most underserved regions of Iberoamerica, Africa, and Asia through our community-led, scalable approach to rural market development and empowering entrepreneurs by providing them access to knowledge, markets, and financial services.

CODESPA sees a world where every individual living in extreme poverty has an opportunity to unlock their highest potential and become self-reliant through access to dignified and sustainable work.

MISSION AND VISION

Who we are

VALUES

We trust that hard **work** is a motor for personal, social and economic development; and **local talent** is the key to the success in solving these problems.

We bet on **innovation** and **sustainability** being the base of change; and the **allies** as impactful strategies.

CODE Method

Create Community-Centered Strategies

Each project is designed by both our local team and the community we are supporting.

Obtaining Participation of the Most Vulnerable

We listen to each person's particularities and we develop the incentives that draw in the participation of the most vulnerable in community activities.

Deliver Knowledge, Financial Services & Market Access

We connect the communities with private businesses, to create or improve the markets, identify job opportunities and provide technology that will make the small local businesses viable.

Empower Locals & Exit

Once our labor is finished, those benefitted continue autonomously, enduring positive impacts in their businesses or jobs over time.

Impactful Numbers

Projects

At CODESPA, we're convinced that the development of one's own capabilities is essential to gaining access to a better job, finding opportunities to generate income and better living conditions. This is the fundamental reason that we incorporate the following trainings into our projects:

- technical assistance and professional training activities.
- training in Business Management for Micro-Entrepreneurs.
- training in Business, Organizational and Leadership Management for Cooperatives and Producer Associations.
- life Skills.

Professional and Micro Business Training

“When CODESPA arrived at our community, we were able to install four knitting stations for women (*mramas*). Learning about this profession has allowed us to step outside of our routine. Thanks to CODESPA we have participated in fairs, showing off our products (*medils*). Now we are the example for other women in neighboring villages and we've been able to see other cities”.

Saida Chouli, President of the Tanafelt Cooperative.

60 women
have improved their living conditions.

11 women
hold management positions.

Income
of Moltaka Rayahin Bakery's has doubled.

In collaboration with the **Santander Best Africa** program from the **Santander Bank Foundation**, we have started two initiatives. The objective of those initiatives is to occupationally integrate women who are victims of domestic violence, in the tourism sector. Our action as ONG has developed in Morocco under two initiatives:

The **Tanafelt Craft Cooperative** in Chefchaouen, has trained 35 women to recover indigenous methods, adapt the designs to the tourism market and improve the commercialization techniques.

The **Moltaka Rayahin Bakery**, created by the Al Amal Association in Tetuan, has trained 25 women to improve management and opening of new commercial channels.

Projects

At CODESPA, we've been collaborating with financial institutions for over 35 years to develop products and services that are inclusive, accessible and personalized, designed to help the local entrepreneurs. At the same time, we improve their trust and solvency so they are able to access credit options, even after we've concluded our efforts. We are specialists in:

- Financial Education.
- Family and business financial management.
- Product and financial service design.
- Savings promotion.

Financial Services for Entrepreneurs

“Since I was a child. I have enjoyed working with wood. My work was made with manual tools, and thanks to a credit that I received from CODESPA, I have improved my business, I have learned more techniques and I now know how to use electric tools. I am able to help my family, which makes me very happy”.

Brayan Lorenzo, member of the “Young Entrepreneurs” savings and credit group.

247 loans
for a total of Q 56.419,45 (7.200 €)
have been turned over to the communities.

127 youth groups
received vocational technical training
focused on entrepreneurship..

Savings of Q 42,721
in one year (€5,500).

Thanks to the technical and financial support from **Social Capital Foundation**, we have adapted our savings and credit methodology **EntreTODOS** to the youth’s needs in the rural communities of Guatemala.

Almost 1,000 youth have joined the savings and credit groups to improve their accessibility to work or starting their own business. This allows them to contribute to their family economy and manage their income, converting in a personal leadership tool.

Projects

Our focus on rural market development is unique. Not only is it focused on giving potential to rural small businesses, but also to social enterprises managed by the rural communities themselves. This way, they open up their cultural richness to the world, through tourism and the production and commercialization of textiles, crafts and other products.

To make this happen, we provide technical assistance and training, nurturing capability to the most vulnerable depending on their needs. This way we encourage job creation and we support local entrepreneurs. In addition, we promote the participation of beneficiaries through credits, and we mobilize other public and private institutions that act as consumers or as producers and providers of services to these communities with the goal of supporting and expanding the markets.

“I am very happy to be able to work here, in my land, in my town. I feel proud of my community, because I see how the people want to be successful, are supporting each other and are partnering with other companies”.

Cleider Akuts Toledo, young entrepreneur from the native Chapi community.

100 kg
of dehydrated leaves have been produced and sold in one year.

100 families
have increased their income.

900 soles
(225 €) in income has been reinvested in payroll and the purchase of raw materials.

NUGKUI is the name chosen by the community Awajún, meaning “Mother Earth”. For the Awajún, it’s an important symbol, since, according to their beliefs, represents life and nature that’s around them.

The objective of this project is to teach 100 indigenous families from the Amazonic communities, paying special attention to the youth. They learn how to use technology to dehydrate bananas, and how to financially manage the production of the dehydrated banana leaves, which is used to create other meals. This business venture financed by **Limmat Stiftung** opens up an opportunity to develop new skills, products and expand their market.

Technical and Consultancy Assistance

We provide consultancy services to government institutions, development agencies, multilateral organizations, companies and ONG to implement projects in the countries where we have a presence. As a success guarantee, we have solid methodologies that allow us to complete our three areas of specialization.

Thanks to our vast experience, strong local presence and multidisciplinary team of expertos, since 2012 we have the area of Development Consultancy, **CODESPApro**.

Principal clients in 2021

Technical cooperation “**Rural infrastructures in Cauca and Nariño in Colombia**”.

Facilitation of economics and family finance workshops in the framework of implementation of information plans, education and communication (IEC) from the agreement about “**Fair trade organic production and responsible consumption**” in the provinces from Chimborazo, Esmeraldas and Manabi in Ecuador.

Consultancy to **update and promote the professional training offer from Condoray Technological Institute**.

Support with the formulation of the **Alcarria de COPRODELI project**.

Capitalization of the **e-Tamkeen Project (Knowledge Management framework agreement)**.

Education and Awareness

Publications

At CODESPA, we create investigations in social innovation with the objective to learn and integrate the latest trends in our projects. We develop proprietary methodologies to give an answer to the latest social challenges.

To **promote community microfinance in Guatemala**, the “EntreTODOS: savings and credit educative groups” program was developed. The publication explains how after accessing credit, the communities cover their basic needs and are able to launch a business.

This publication is directed to the agricultural sector in the province of Cunene, **Angola**. The principal objective is to show that it is possible to recognize the **women’s right to access, security of tenure and land management**.

Education and Awareness

Growth Business Roundtable initiative

The Growth Business Roundtable initiative is an innovative solution accelerator to the social problems of our time, based on the investigation and collaboration.

CODESPA leads this initiative with a group of businesses and business foundations committed to inclusive growth.

WEBINAR

The potential of inclusive business in corporate strategy

In collaboration with ICEX, we organized an online seminary where many business with inclusive business models shared their successful experiences. **Q'omer** and **CEAMSA** have participated.

WORKING DAY

Inclusive Growth: the business contribution to shared prosperity

Together with the Fundación UNIR, we presented the results of our fourth publication in the Rioja. The meeting offered a practical vision from the business implication in the inclusion process from the most vulnerable sectors in the region. Some participants were **Cáritas La Rioja, Divina Seguros, Prosegur** and the **Federation of Companies of La Rioja (FER)**.

PROSPER4ALL

Development of tool to measure inclusive growth

Prosper4ALL has begun development, an indicator that works to measure the economic and social values generated by the business for their interest groups, specifically for disadvantaged people. 14 businesses have participated in the pilot project like **Orange, Roca&Junyent, Repsol** and **Cabify**, among others.

INVESTIGATION

Start of the V Report on Stakeholders and shared value

Representatives of the public sector, the academic world and the business took part in courses for the creation of the V report on the relationship between companies and their stakeholders.

We submit to various control mechanisms:

- ✓ We are audited each year by KPMG.
- ✓ We are an NGO certified by Fundación Lealtad.
- ✓ We have the CONGDE Transparency and Good Governance seal.
- ✓ We have the Guidestar Gold Seal of Transparency.

Milena Taquez is a technician in the Aproleche cooperative and since she attended one of our classes, she supports his community in emergency veterinary clinics and basic assistance, activities that are commonly done by men.

Thank you to everyone
that collaborated, with it
we have made it another
year.

We count on you
to continue writing
CODESPA's history,
making our mission a
reality.
