President's letter

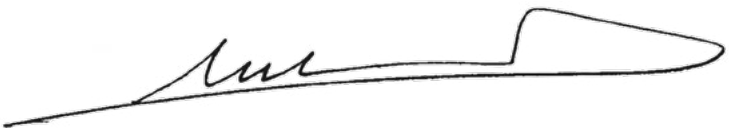

The year 2022 has been pivotal in consolidating CODESPA's new identity. We began with the launch of the **CODE Method, our approach to tackling poverty and inequality**. For more than 35 years, we have been perfecting this approach, which has lifted millions of people from poverty to prosperity.

But it is not only CODE that has been new. We have also incorporated innovative elements in our way of working, in order to be rigorous in measuring our impact. Not to mention the strategic allies that ensure a sustainable exit strategy for our projects.

Every project that is born is an opportunity for people to unfold their potential and talent in a fundamental area of their lives: work. Because for us, **building people's confidence means fostering their autonomy**.

This report collects data and stories of transformation. A small sample of all that we have achieved together this year. In particular, we highlight three examples in Bolivia, Ecuador and DR Congo, which demonstrate that it is possible to generate employment and entrepreneurship in adverse contexts. Also, in the framework of the Business Observatory for Inclusive Growth, we are proud to present the *Business Guide for Inclusive Growth: Stakeholders and Shared Value*.

I encourage you, together, to continue writing CODESPA's history.

Manuel Herrando Prat de la Riba
President of CODESPA Foundation

Photo of the winners at the XXI Edition of the CODESPA Awards on February 2, 2022, presided over by His Majesty The King Felipe VI.

“Fostering confidence in people means fostering their autonomy”.

Who we are

We are on a mission to contribute to elevate 10 million more people from poverty to prosperity in the most underserved regions of Iberoamerica, Africa, and Asia through our community-led, scalable approach to rural market development and empowering entrepreneurs by providing them access to knowledge, markets, and financial services.

CODESPA sees a world where every individual living in extreme poverty has an opportunity to unlock their highest potential and become self-reliant through access to dignified and sustainable work.

—MISSION & VISION—

Who we are

VALUES

We trust that hard work is a motor for personal, social and economic development; and local talent is the key to the success in solving these problems.

We are committed to innovation and sustainability as the basis for change; and alliances as a strategy for impact.

Projects

At CODESPA, we’re convinced that the development of one’s own capabilities is essential to gaining access to a better job, finding opportunities to generate income and better living conditions. This is the fundamental reason that we incorporate the following trainings into our projects:

- Technical assistance and professional training activities.
- Training in Business Management for Micro-Entrepreneurs.
- Training in Business, Organizational and Leadership Management for Cooperatives and Producer Associations.
- Life Skills.

Professional & Micro Business Training

“After my mother passed away, I became my father’s right-hand person. I have always wanted to learn to stand on my own two feet. I encourage many women who are in charge of their families, and who don’t have enough support, to participate. It’s not easy to find work here and this training is a great opportunity”.

Viviana Medrano, beneficiary of the workshops on “Commercial Cooking”, El Alto in Bolivia.

Project featured

1,500 young people have been trained to develop their working life project.

200 young people have been hired by private sector companies.

In Bolivia, we have supported young adults, women, and individuals with disabilities, facilitating their access to jobs in customer service, catering, microcredit, savings, and loan counseling. Additionally, we have assisted vulnerable individuals in starting their own businesses.

The project, called “Opportunities”, has been developed in the cities of La Paz and El Alto; areas of the country with high percentages of social mistreatment and labor exploitation due to the lack of knowledge of their labor rights.

The **Madrid City Council** and the **Ser Familia Foundation** have been our main allies. Numerous companies, local institutions, government programs and technical institutes have also participated.

Projects

At CODESPA, we've been collaborating with financial institutions for over 35 years to develop products and services that are inclusive, accessible and personalized, designed to help the local entrepreneurs. At the same time, we improve their trust and solvency so they are able to access credit options, even after we've concluded our efforts. We are specialists in:

- Financial education.
- Family and business financial management.
- Design of financial products and services.
- Savings promotion.

Financial Services for Entrepreneurs

"I have been working as a barrel carpenter for over 40 years, and for the first time I have been able to apply for credit to buy what I need. From lumber, to lacquer, to sealant, to nails. My son sees what I do, he learns an almost lost profession. I hope someday he will follow in my way".

Gerardo Arias, member of Asociación Provincial de Discapitados Visuales de Chimborazo (APRODVICH), in Ecuador.

Project featured

193 people with sidual impairment have participated in training activities.

30 enterprises have been strengthened with seed capital.

Since 2021 in Ecuador we lead a consortium with national and international organizations of visually impaired people. The project is funded by **USAID** and has the support of **FOAL**, the National Federation of the Blind of Ecuador (**FENCE**) and the **ÁGORA** Program, promoted by the **Ministry of Labor**.

The purpose of the project is to advance the economic and labor rights of visually impaired people. To this end, an ecosystem has been created to improve employability and create an entrepreneurial network.

Projects

Our focus on rural market development is unique. Not only is it focused on giving potential to rural small businesses, but also to social enterprises managed by the rural communities themselves. This way, they open up their cultural richness to the world, through tourism and the production and commercialization of textiles, crafts and other products.

To make this happen, we provide technical assistance and training, nurturing capability to the most vulnerable depending on their needs. This way we encourage job creation and we support local entrepreneurs. In addition, we promote the participation of beneficiaries through credits, and we mobilize other public and private institutions that act as consumers or as producers and providers of services to these communities with the goal of supporting and expanding the markets.

“Our land is very productive. For generations our people have lived from the production of *chikwangue*. Thanks to the new five hectares of cassava that we have acquired, my children will be able to continue this community work”.

Matinda Ngasu, member of the Plateau Batéké Women’s Cooperative, D.R. Congo.

Project featured

150 women
have managed to increase their income by at least 20%.

5 new markets
are supplied by the production of women’s associations.

Improve access to markets and food security for more than 160 women. This is the objective we want to achieve in the rural communities of the Plateau de Batéké region, in the Province of Kinshasa, D.R. Congo.

The project consists of training in business management, environmental protection and improving their economic and social participation. These are women in vulnerable situations who have managed to develop small businesses of honey, acacia wood and cassava.

The Andalusian Agency of International Cooperation for Development (AACID) and the NGO **Gi-Agro** have been our main allies.

Technical & Consultancy Assistance

We offer consultancy services to government institutions, development agencies, multilateral organizations, companies, and NGOs for project implementation in countries where we operate. Our success is backed by solid methodologies, and we specialize in three areas. With our extensive experience, local presence, and a multidisciplinary team of experts, we have been operating our development consultancy arm as CODESPApro since 2012.

Thanks to our vast experience, strong local presence and multidisciplinary team of experts, since 2012 we have the area of Development Consultancy, **CODESPApro**.

Principal clients in 2022

"Estudo de linha de base agrícola. Assessment the Agriculture Research Baseline", in Angola.

"Preliminary study of agricultural chains with commercial potential for rural communities in the dry corridor of Guatemala".

"Design of a Trust Fund and public management instruments for the Ucayali Jurisdictional REDD+ Program", in Peru.

Formation & Awareness

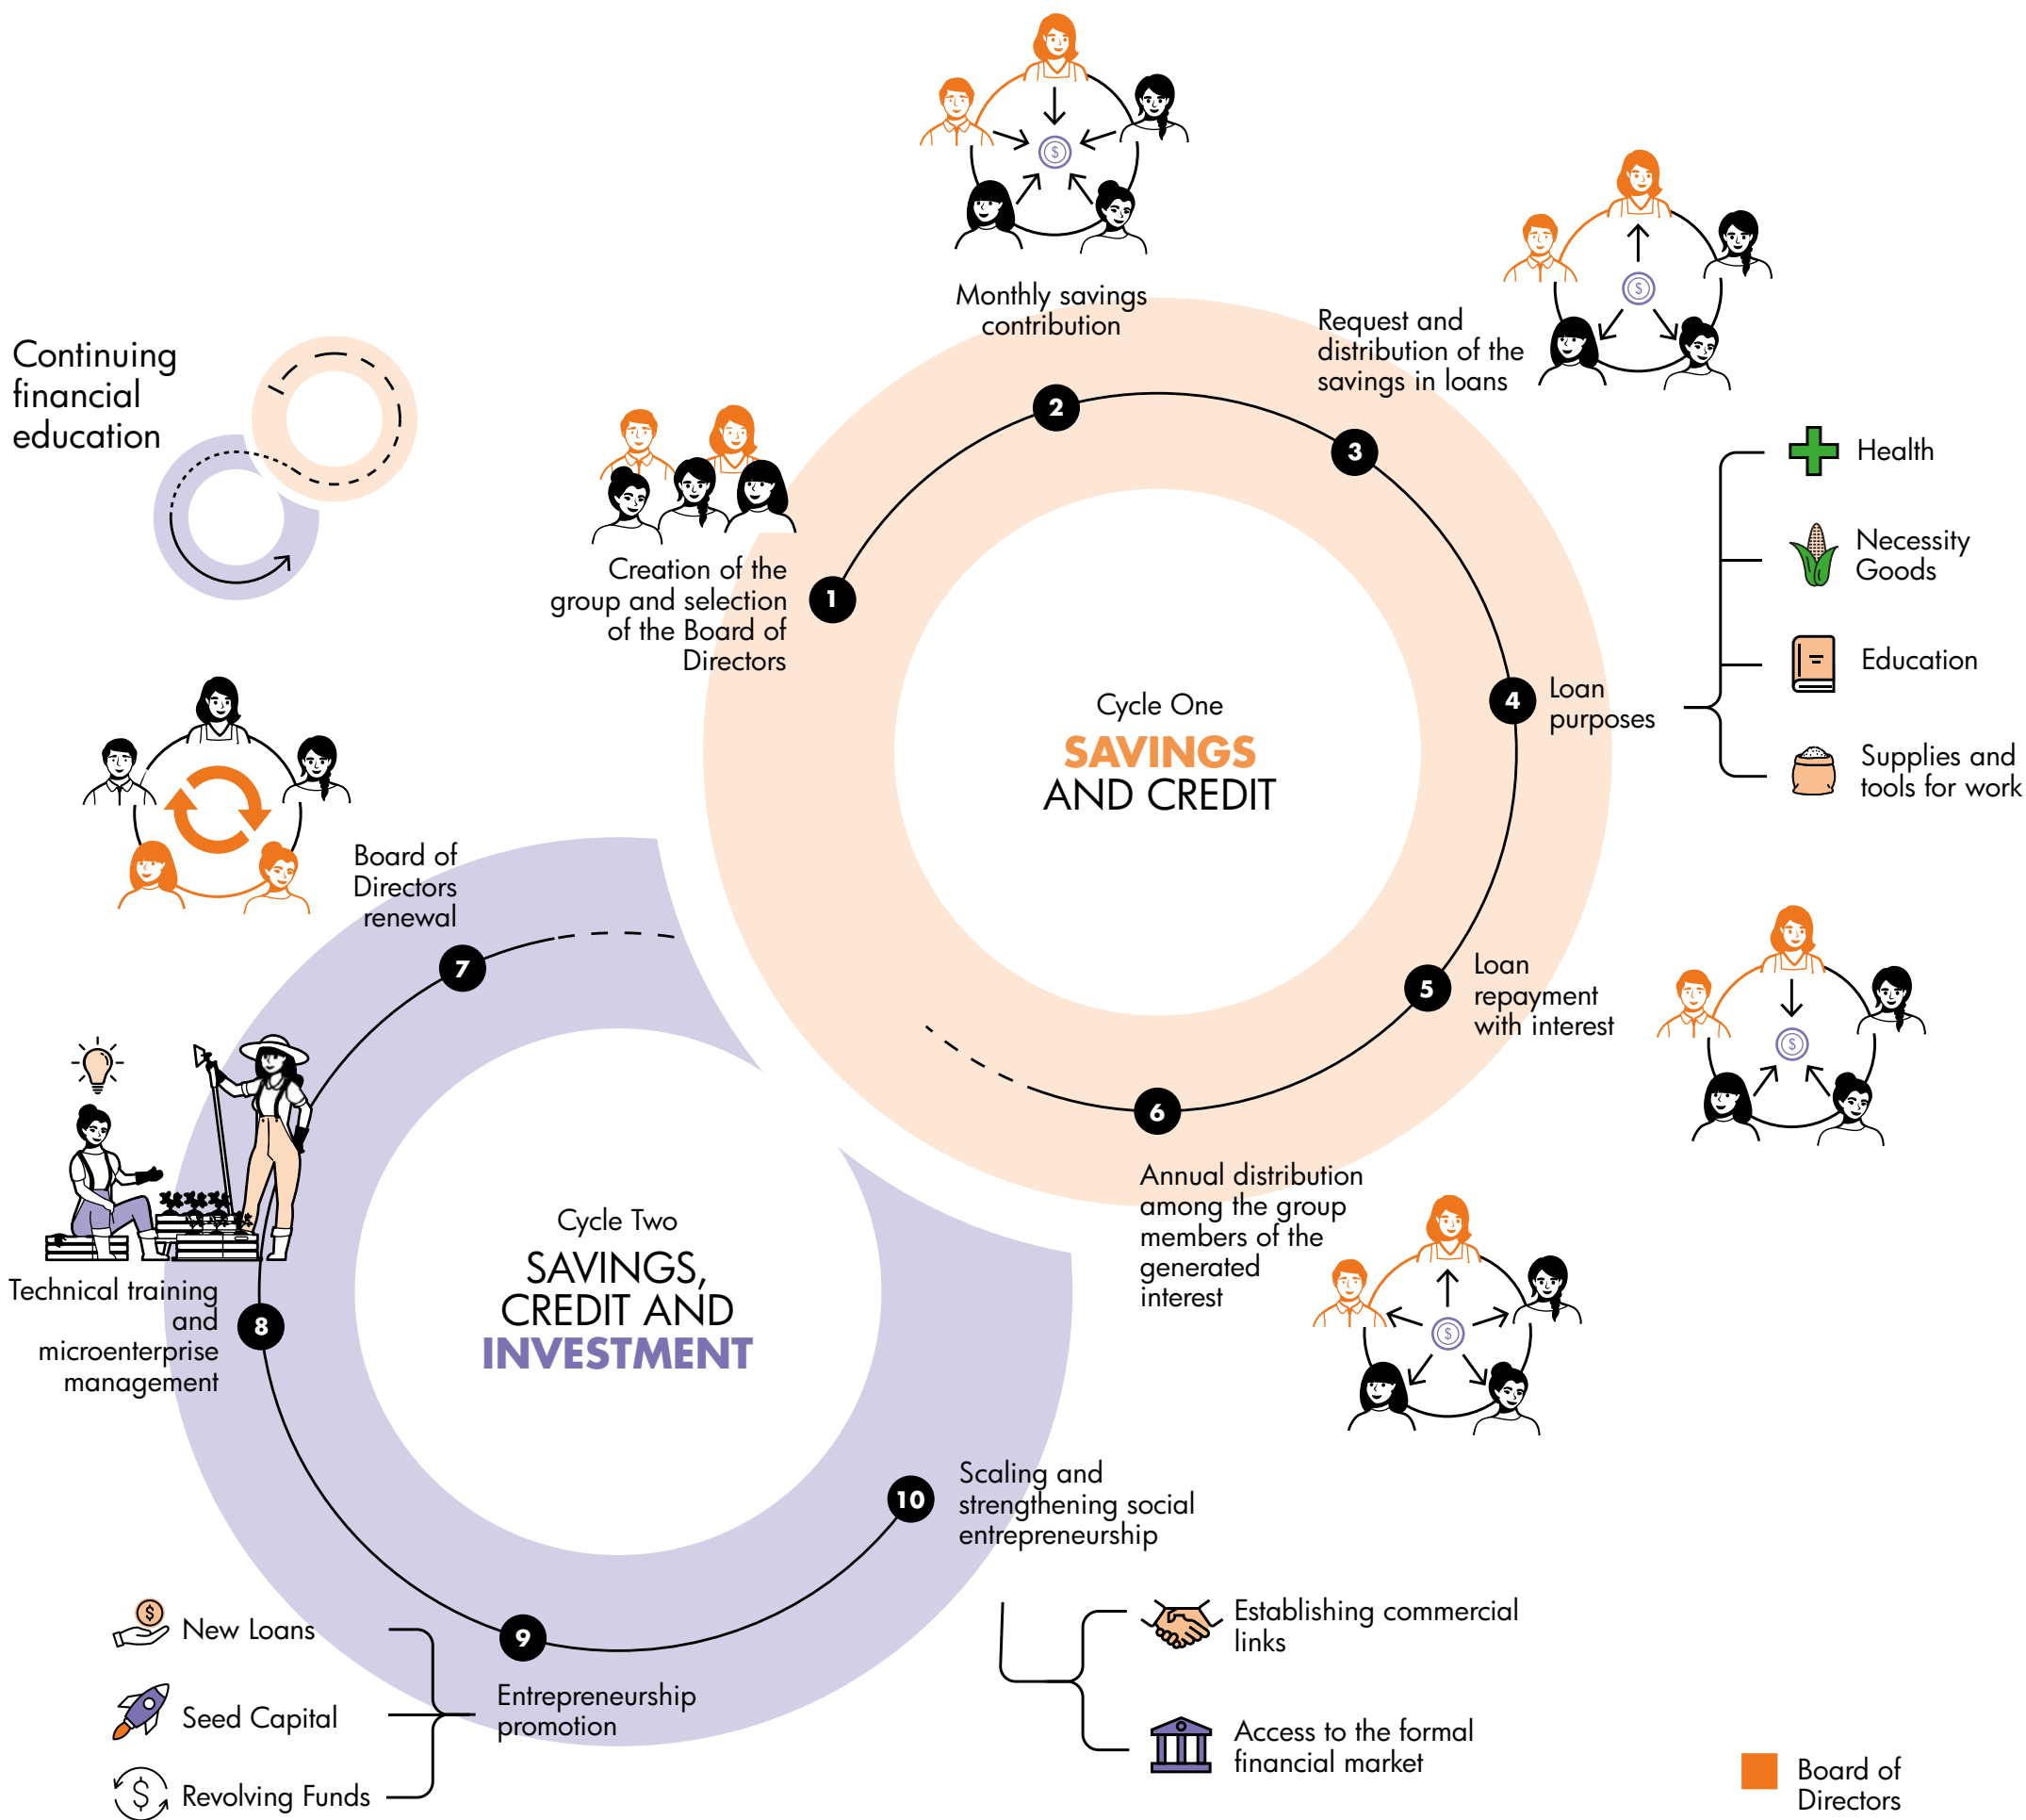

Publications

At CODESPA, we create investigations in social innovation with the objective to learn and integrate the latest trends in our projects. We develop proprietary methodologies to give an answer to the latest social challenges.

EntreTODOS is our own methodology that teaches savings and facilitates access to credit. It is aimed at people in vulnerable situations.

Groups of 10 to 20 people join together to save a certain amount of money each month. In this way, they create a common fund that allows them to access credit for small investments under advantageous conditions. In this way, the communities manage their own development.

Education & Awareness

Growth Business Roundtable initiative

The Growth Business Roundtable is an innovative accelerator addressing today's social problems through investigation and collaboration.

CODESPA leads this initiative with a group of businesses and business foundations committed to inclusive growth.

MEETING

First meeting on social innovation

On this occasion we had the participation of **Ferrán Gelis**, Delegate of CODESPA Ecuador and **María Cruz-Conde**, Co-Director of Open Value Foundation to talk about impact investment.

INVESTIGATION

Publication of the sixth annual report

The *Business Guide for Inclusive Growth: Stakeholders and Shared Value* stresses the importance of investing in strategies capable of creating opportunities for the most vulnerable groups.

FORMATION

First inclusive business program

In collaboration with **ICEX**, we offer a pioneering course on inclusive business in Spain. Designed for private sector companies seeking to integrate inclusive practices into their internationalization strategy.

AUDIENCE

Reception of H.M. The King Felipe VI

At the XXI CODESPA Awards, Growth Business Roundtable partners discussed inclusive economic recovery efforts in Spain, including the proprietary tool, **Prosper4ALL**, used to measure the social impact of companies.

We submit to various control mechanisms:

- We are audited each year by KPMG.
- We are an NGO certified by Fundación Lealtad.
- We have the CONGDE Transparency and Good Governance seal.
- We have the Guidestar Gold Seal of Transparency.
- We are an NGO accredited by USFCR.

A woman with dark hair tied back, wearing glasses and a white sweater, is crouching in a greenhouse. She is surrounded by lush green tomato plants. Some tomatoes are green, while others are ripening and turning yellow or orange. The greenhouse has a brick wall and large windows in the background. The lighting is warm and natural, suggesting daytime.

Melany Gutiérrez has created JALLP`AY, a venture to grow agro-ecological, chemical-free, vegetables. The organic fertilizers she uses restore soil fertility. In this way she promotes healthy eating, adapted to the environment of the Río Abajo region in Bolivia.

Thanks to all who
collaborated, we've
seen another year of
increased impact!

We count on you to
continue shaping
CODESPA's history and
making our mission a
reality.
